

THE STRUCTURE OF MATHEMATICAL REALITY

Phase I — Chapter 1

Mathematics Is Not About Numbers

Parallel Reading

Self-Study Curriculum

Parallel Reading: PCM, Part I (“Introduction”), sections I.1 (“What Is Mathematics About?”) through I.3 (pp. 1-47). Read slowly. Mark every sentence where you think “I always assumed this but never saw it stated.”

Also read: Paul Lockhart, “A Mathematician’s Lament” (25-page essay, freely available online: this is a different text from the book *Measurement*, and it sets the tone for the entire curriculum).
