

THE STRUCTURE OF MATHEMATICAL REALITY

Phase V — Chapter 16

Category Theory: The Mathematics of Mathematics

Parallel Reading

Self-Study Curriculum

Parallel Reading: Lawvere & Schanuel, *Conceptual Mathematics*, Parts I and II, Articles I and II together with their discussion Sessions (approximately 120 pages). Read slowly, this book is deceptively simple. The ideas are deep and the notation is minimal.

Also read: PCM section III.8 (“Categories”). This is a denser overview for reference.
