

THE STRUCTURE OF MATHEMATICAL REALITY

Phase V — Chapter 17

Open Questions and the Shape of the Unknown

Parallel Reading

Self-Study Curriculum

Parallel Reading: Finish any remaining sections of the PCM that interest you. Also read: PCM, Part VIII (“Final Perspectives”): particularly section VIII.2 (“’Why Mathematics?’ You Might Ask”) and section VIII.6 (“Advice to a Young Mathematician”).

Also read: David Hilbert, “Mathematical Problems” (1900): read the introduction and the first three problems. This is the most famous articulation of what it means to map the unknown in mathematics. A translation is freely available online.
